Info:

2010 marks the 15th Anniversary of the South African Depression and Anxiety group (SADAG). For the last 10 years SADAG has been at the forefront of providing counseling services, mental health awareness programs, powerful media campaigns and rural outreach initiatives to thousands of patients, families and communities in South Africa. This commitment to promoting mental health across South Africa was recognized by the World Bank Development Marketplace in 2003 with a substantial grant towards SADAG's Rural Development Program.
